(normally) conductive bars.

The solution to this problem, as proposed in claim 1 of the present application, is considered to involve an inventive step (PCT Article 33(3)), since the alterations to the construction of the switch described in claim 1 are not obvious to a person skilled in the art.

Claims 2 to 9 are dependent on claim 1 and thus also comply, as such, with the PCT requirements of novelty and inventive step.

D2 describes a socket for an external bushing and not a switch.
